

## Kemiko Concrete Floor Stain

Kemiko Stone Tone concrete floor stain transforms concrete into an elegant floor that resembles marble or glazed stone. The concrete can be stained and scored and creates the appearance of expensive flooring. It is the perfect finish to turn concrete into a luxurious floor that is very affordable.

Rembrandt Colors polymer concrete coatings give you a palette of artful colors for concrete. It is a consumer friendly, easy to use, decorative solution for concrete.

Kemiko is the perfect choice for both interior and exterior concrete surfaces. Often used in commercial settings, Kemiko concrete finishes give a clean, attractive look. Use them on driveways, patios, walkways and entrances as well as concrete decorative items such as statues and urns. It is affordable and used in many different applications.

Kemiko stained or coated concrete floors are tops in terms of permanence and durability. The stains will not chip, fade, or peel, and they last the lifetime of the surface to which it is applied. The floor is virtually maintenance free. Wax or sealer can be applied to further enhance depth of color and provide surface protection.

Kemiko finishes on concrete enhance the setting with any decor.
